ICICI Pru

Group Unit Linked Superannuation

Non-Participating Linked, Pension Savings Group Annually Renewable Product

ICICI PRUDENTIAL LIFE INSURANCE

INTRODUCTION

ICICI Pru Group Unit Linked Superannuation (GULS) is an annually renewable, non-participating unit-linked group pension product. GULS will be offered to employers who wish to administer their Superannuation Schemes, and Superannuation trusts created by an employer to administer their Superannuation Schemes. They will be the Master Policyholder under this product. However, it is not mandatory for the employer to get all of its schemes administered by ICICI Prudential Life Insurance Company Ltd.

GULS allows for accumulation of savings and benefit payments as per the Superannuation Schemes rules of the policyholder.

The contributions made by the Master Policyholder will be invested in unit linked funds of ICICI Prudential Life Insurance Company Limited (or the Company). The Fund Value of a particular unit linked fund is calculated as number of units held in the fund multiplied by the prevailing Net Asset Value (NAV)(T&C) of the respective unit linked fund. The Master Policyholder can choose amongst unit liked funds, as detailed under the Investment Options section.

GULS can be offered to Defined Benefit (DB) and Defined Contribution (DC) Superannuation Schemes administered by the Master Policyholder. In either case, the Company's liability to the Master Policyholder will at all times be limited to the unit fund of the policy, subject to guarantees. The guarantees are described in the minimum guarantees section.

A GULS policy for a DB scheme will have a Scheme Account. This is an account linked to the policy and is attributable to the Master Policyholder. Scheme Account Value is the sum of Fund Values across various unit linked funds in the policy.

A policy for a DC scheme will have Member Accounts. These are accounts linked to the policy and attributable to members of the policy. Member Account Value is the sum of Fund Values in respect of investments in the unit linked funds for a member. We shall send member account statements at the end of every financial year.

A Master Policyholder can make contributions into the Scheme Accounts or Member Accounts. All transactions are effected to these Accounts. The policy value is the Scheme Account Value or the aggregate of Member Account Values, as applicable.

HOW DOES THE POLICY WORK?

GULS offers a comprehensive range of group unit linked funds to suit the risk appetite of the policyholders. These funds are detailed in the Investment section.

The Master Policyholder can make contributions to these unit linked funds, which will lead to allocation of units to the policy. The Master Policyholder can make claims from these unit linked funds, which will lead to unit deductions to the policy. The unit additions and deductions will be at the prevailing NAV of the respective unit linked funds. The contributions and claims to the policy will be as per the superannuation scheme rules of the Master Policyholder.

Loyalty Additions are allocated to the policy at the end of every policy year. These additions will increase with the size of the funds invested with the Company.

GULS offers eight options as described in the GULS Options section.
